Back-end : Core java ,Spring boot ,Advance java

Front-end : HTML,CSS,JavaScript,React

Database : Database Design SQL

PROJECT

Project Title: Employee Management System

Project Description: Employees are crucial to a company's success. An Employee Management Software simplifies tracking employee records and operations such as editing, adding, transferring, promoting, or terminating employees. It allows easy position changes without reentering data, checks for duplicates, and assigns tasks to track performance. This user-friendly system is ideal for small to medium-sized companies that integrate various HR processes to align with organizational goals. It offers a straightforward, efficient solution for managing employee details, even for users unfamiliar with similar systems. The project aims to improve electronic employee management by addressing current gaps.
